

RatticDB

Elizabeth Sørensen
@zemmiph0bia

What?!

- Open Source
- Django <3
- Simple to use
- Able to manage humans
 - Departing team members
 - LDAP / Active Directory
- Audit logs for accountability
- Simple API
- Import from KeePass 1.x

Why?!

- Several types:
 - Filesystem
 - Network
 - Post-it Note
- Trouble handling larger teams
- UI's are often a disaster
- Hard to audit
- Difficult to manage team changes
- Managing ACL's can be a pain point
- May only work on Windows / OSX

How?!

- Encryption is done on the filesystem
- We rely on HTTPS being setup
- Works on databases supported by Django
- Passwords are in a single group
 - Tagging for organization
- Change queue for your pleasure
- Users can be a member of many groups
- LDAP / AD integration
