

SAGE NZ?

- SAGE: System Administrators Guild
- US based (originally part of Usenix)
- Runs LISA conference with Usenix
- <http://www.sage.org/>

- SAGE-AU: System Administrators Guild of Australia
- <http://www.sage-au.org.au/>

- SAGE-NZ: <http://www.xinqu.net/sage/>
- Was a SIG of Uniform, but Uniform no longer exists
- Is anyone interested in reviving SAGE-NZ?

ssh -L and iptables -t nat -A OUTPUT -j DNAT

- `ssh -L $LOCALPORT:$REMOTEDEST:$REMOTEPORT ...`
- `.ssh/config`:
`LocalForward $LOCALPORT $REMOTEDEST:$REMOTEPORT`
- Now you have to connect to `127.0.0.1:$LOCALPORT` to use
- `iptables -t nat -A OUTPUT -p tcp`
`-d $REMOTEDEST --dport $REMOTEPORT`
`-j DNAT --to-dest 127.0.0.1:$LOCALPORT`
- Translates outgoing connections from your machine
- Connect as normal and it goes through the forwarded connection
- OpenSSH can act as a SOCKS server: `ssh -D $LISTENPORT`
- But need application support or wrappers for SOCKS
