Linux for Human Beings

"Ubuntu" is an ancient African word, meaning "humanity to others". Ubuntu also means "I am what I am because of who we all are". The Ubuntu Linux distribution brings the spirit of Ubuntu to the software world.

Ubuntu is a complete Linux-based operating system, freely available with both community and professional support. It is developed by a large community and we invite you to participate too!

The Ubuntu community is built on the ideas enshrined in the Ubuntu Manifesto: that software should be available free of charge, that software tools should be usable by people in their local language and despite any disabilities, and that people should have the freedom to customise and alter their software in whatever way they see fit.

These freedoms make Ubuntu fundamentally different from traditional proprietary software: not only are the tools you need available free of charge, you have the right to modify your software until it works the way you want it to.

The team behind Ubuntu makes the following public commitment to its users:

- Ubuntu will always be free of charge, and there is no extra fee for the "enterprise edition", we make our very best work available to everyone on the same Free terms.
- Ubuntu comes with full commercial support from hundreds of companies around the world. Ubuntu is released regularly and predictably: a new release is made every six months. Each release is supported

Plone Defined

Plone is:

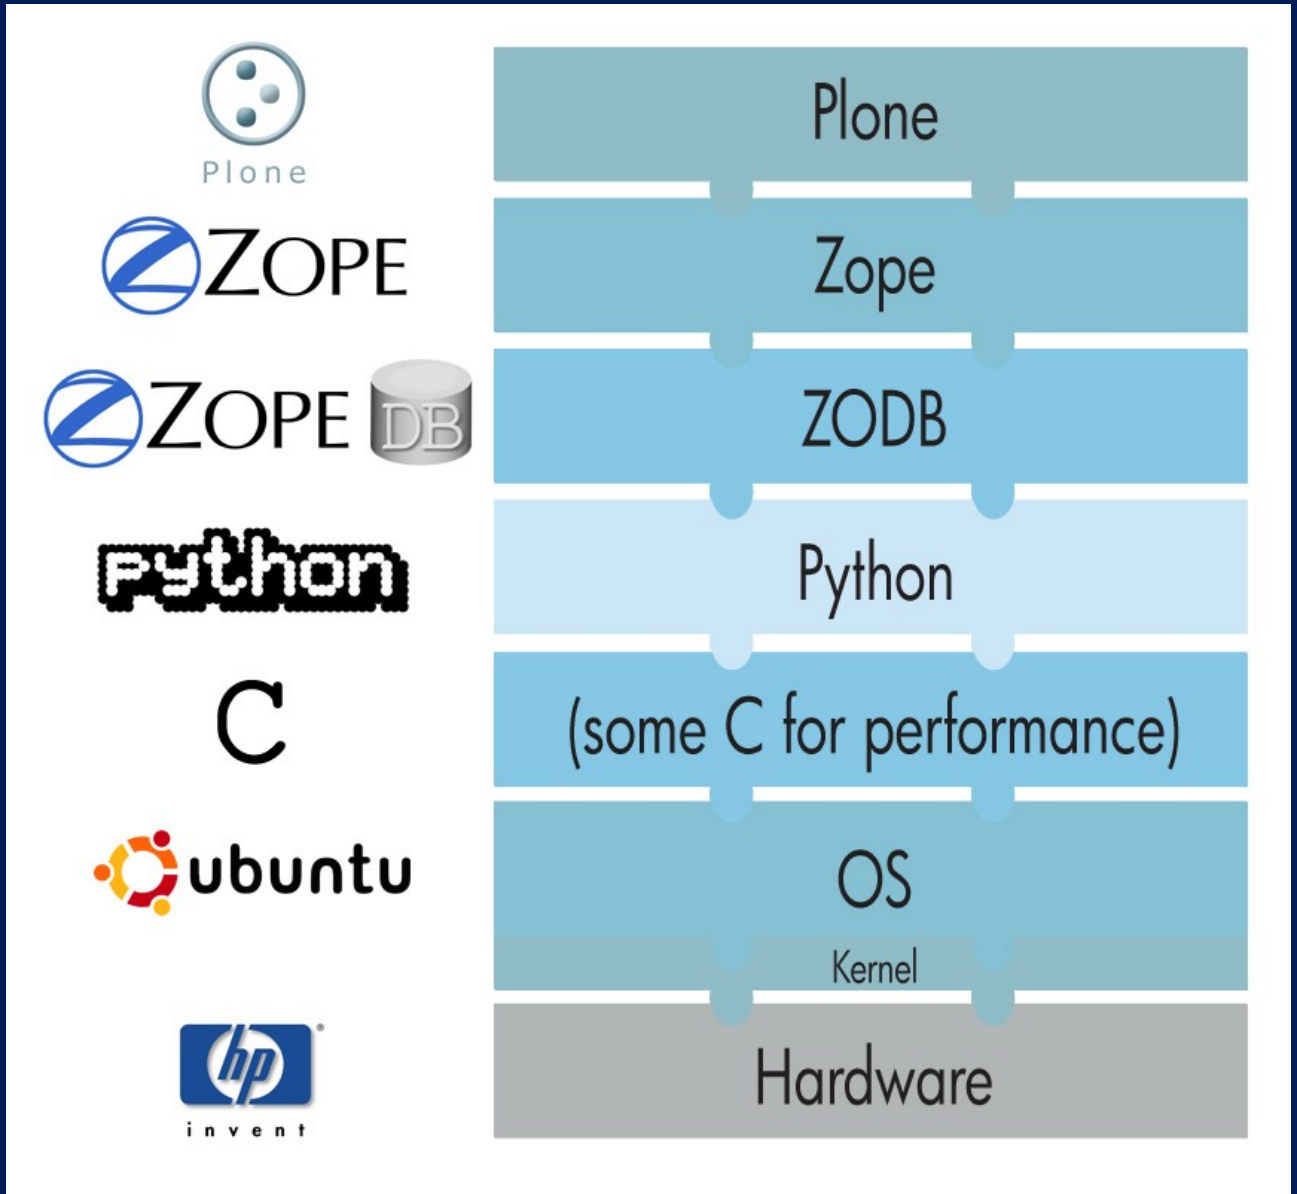
- Open Source Content Management System (CMS)
- Licensed under GNU General Public License (GPL)
- CMS – A tool for the creation, maintenance and presentation of information by anyone
- Content is:
  - documents, images, a sound/movie bit, basically any data that needs to be communicated.

Plone Defined

- Architecture is built on Zope, an object-oriented application server
- Zope and Plone are based on Python
- Plone uses the ZODB, Zope's built in transactional object database

Plone Defined

Technology Stack



Who Is Plone?

- Core Developers:

  http://plone.org/about/team

  Alan Runyan, Alexander Limi, Vidar Andersen, Paul Everitt, Helge Tesdal, Sidnei da Silva, Lalo Martins, Benjamin Saller, Geoff Davis, Kapil Thangavelu, Andy McKay, Philipp Auersperg, Geir Baekholt, Joel Burton
- Community
- Plone Foundation

Plone Features and Demo

"Our knowledge is the amassed thought and experience of innumerable minds."

~Ralph Waldo Emerson

Plone Features

- Powerful out-of-the-box features
- Quick startup to gain competitive advantage
- 200+ add-on products – issuetracker, shared calendars, forums
- Flexibility, scalability (as you grow, it grows)
  - http://www.nato.int/
- Usability

Plone Features

- Strong community support
- Tools for multilingual content
- Extensible
- Technology neutral
  - rx2600 ia64 single processor on Debian Sarge
  - DL360g3 i386 dual processor on SLES9 w/ backend storage MSA1000 (up to 4TB of disk space)
  - Ubuntu laptop
- Easy Installation, platform independent

Demo

Demo Specifics

- Plone2.1.1, Zope2.8.5, python2.3 on Ubuntu 5.10
- Apache – Plone can also be fronted with Apache web server

Demo Outline

- Plone out-of-the-box
- User features
- Admin features
  - Zope Control Panel
  - Zope Management Interface (ZMI)
- Customizations
- Add-on products

Plone and New Zealand

Plone and NZ

- The State Services Commission – oversees the e-government programme in NZ - has recently announced an instance of Plone 2.0.5 that will be made freely available to central and local government agencies

LOVELY SYSTEMS

Wir von Telesis sind auf die Gründung der Firma LOVELY SYSTEMS auch ein klein wenig stolz! Jodok Batlogg war doch eine Zeit lang Teil von Telesis. Telesis organisierte mit Jodok die internationalen Entwickler-Sprints, die Open Source Initiative Vorarlberg usw.. Die Aufgaben rund um das CMS Plone nahmen schnell zu, die Crew ist gewachsen und so ist es für Telesis Zeit geworden los zu lassen. Jodok hat mit seinem Partner Manfred ein tolles Team von Technikern zusammengestellt und die Firma gegründet. Am neuen Standort in Dornbirn steht nun genügend Platz für weiteres Wachstum zur Verfügung. In die Stadt, dort zieht es die jungen Leute hin, das müssen wir in der Regionalentwicklung Tätigen mit Wehmut annehmen. Trotz der Räumlichen Distanz (15 min Fahrzeit)werden wir viel in Kontakt bleiben. »

Welcome to Plone
by admin — last modified 2006-01-12 09:48
Congratulations! You have successfully installed Plone.
If you're seeing this instead of the web site you were expecting, the owner of this web site has just installed Plone. Do not contact the Plone Team or the Plone mailing lists about this.
The first thing you should do is to set up your site by visiting the Site Setup area. Become familiar with Plone by getting one of the Plone books, and make sure you look at the available add-on products and online documentation.
Quick Start
Some useful hints if you are new to Plone:
Access key + 4 focuses the LiveSearch field - you can start writing your search terms straight away, and have all your information at your fingertips without leaving the keyboard. For information about how to use access keys in your particular browser, see the Accessibility page.
Plone will automatically be displayed in the language your browser asks for. If you need more control over languages in Plone, install Plone Language Tool from the Site Setup. If you need to maintain your content in multiple languages, download LinguaPlone.
Workflow states are color coded if you are logged in, so it is easy to keep track of content security and visibility. Try the Site Map with color coding for a visual security inspection of your site!
If you prefer working with pure HTML, Structured Text or ReStructured Text markup instead

Add sharing permissions to users
Sharing is an easy way to allow others access to collaborate with you on your content. To share this item, search for the person's name or email address in the form below, and assign them an appropriate role. The most common use is to give people Manager permissions, which means they have full control of this item and its contents (if any).

Welcome to Plone
by admin — last modified 2006-01-12 09:48
Congratulations! You have successfully installed Plone.
If you're seeing this instead of the web site you were expecting, the owner of this web site has just installed Plone. Do not contact the Plone Team or the Plone mailing lists about this.
The first thing you should do is to set up your site by visiting the Site Setup area. Become familiar with Plone by getting one of the Plone books, and make sure you look at the available add-on products and online documentation.
Quick Start
Some useful hints if you are new to Plone:
Access key + 4 focuses the LiveSearch field - you can start writing your search terms straight away, and have all your information at your fingertips without leaving the keyboard. For information about how to use access keys in your particular browser, see the Accessibility page.
Plone will automatically be displayed in the language your browser asks for. If you need more control over languages in Plone, install Plone Language Tool from the Site Setup. If you need to maintain your content in multiple languages, download LinguaPlone.
Workflow states are color coded if you are logged in, so it is easy to keep track of content security and visibility. Try the Site Map with color coding for a visual security inspection of your site!
